### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Status of the Application***

1. **Claims 1-40** are pending in this application.
2. **Claims 2-12 and 17-33** are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected inventions.

### ***Claim Objections***

3. Claims 13-16 are objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. The computer readable medium of claim 13 as currently recited is not positively recited to perform the steps of claim 1.

### ***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3627

Claims 1, 13-16, and 34-40 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lane et al. (US Publication No. 2005/0137904 A1) in view of Hiranaka et al. (NPL in 03/30/2006 IDS).

Lane, as applied above shows all of the limitations of the claims except for specifying the identification data to comprise a global routing prefix of an Internet Protocol address, a second data element comprises an asset identifier, a third data element containing predetermined fixed data representing a tag index; and wherein the first, second and third data elements are compliant with an Internet Protocol version 6 address format.

Lane et al. shows a method of asset management comprising sending an identification query to an asset identification tag (Abstract); receiving identification data from the asset identification tag (Abstract, Paragraph [0082]); determining a uniform resource locator for a selected asset lookup service of the received global routing prefix (Figure 8, Paragraph [0082]); and based on the determined uniform resource locator sending the received asset identifier to the asset lookup service (Figure 8, Paragraph [0082]).

Hiranaka et al. teaches use of identification data compliant with Internet Protocol version 6 address format wherein identification data comprise a global routing prefix of an Internet Protocol address, a second data element comprises an asset identifier, and a third data element containing predetermined fixed data representing a tag index (Pages 1-4).

Based on the teaching of Hiranaka et al., it would have been obvious to one of ordinary skill in the art, at the time the invention was made, to modify the Lane et al. identification data to comprise a global routing prefix of an Internet Protocol address, a second data

element comprises an asset identifier, a third data element containing predetermined fixed data representing a tag index; wherein the first, second and third data elements are compliant with an Internet Protocol version 6 address format in order to take advantage current reliable technology.
